

Beam Mounts

***\$100 Credit**

***credit applies to the Beam Mounts only**

Beam Mounts for the Big Blue Bike Lift and Original Red Beam Mounts are suited to any road going bike that has a duplex frame (twin chassis rails) slung below either side of the engine. In particular Harley Davidson's, the wide variety of Japanese Custom Bikes and many of the Classics which are still in regular use. Beam Mounting brackets are designed to take full advantage of the wide-based twin chassis frame layout to offer you a rock-solid method of raising these special bikes

Can-Am mount

Used with the Big Blue Lift ONLY. Even the massive Can-Am Spyder can be lifted with the Easy Rizer Big Blue Lift. Whether your cleaning, servicing or repairing your Can-Am Spyder you can raise your machine to work bench height safely and securely with your Big Blue.

Ducati Mounts

Ducati Mounts Original Red Only This mounting has been designed specifically for use with Ducati's Complete Bracket Set

EASY RIZER RED

These mounts are the Swiss army knife of mounts. They were designed to lift virtually all motorcycles, whether it's a V-twin, parallel twin, triple, or four. The rear mount brackets support the motorcycle under the foot peg pivot pin castings.

Footpeg Mounts

Footpeg Mounts for the Big Blue Bike Lift and Original Red
These mounts are the swiss army knife of mounts they were designed to lift virtually all motorcycles regardless of age. Whether its a v-twin, parallel twin, triple, or four, these mounts work! Available in standard and heavy duty types.

Frame Mounts

Frame Mounts for the Big Blue Bike Lift and Original Red
These mountings have been designed for applications where it is not possible to lift the bike by employing the normal 'beam' method in pairs, due to obstructions or uneven surfaces such as the exhaust system or crankcase falling below the frame line of the bike.

HONDA GOLDWING MOUNT

HONDA VALKYRIE MOUNT

This mounting has been designed specifically for use with the Valkyrie and must be used in conjunction with the Beam Mounting kit.

Multi Mounts

Multi Mounts for the Original Red Only When using Multi-Mounts to lift v-twin engined bikes you may choose to opt for our V-Twin variant which uses an alternative top element for the front lifting bracket; this enables you to support the bike via the cylinder barrel as opposed to cradling the collector pipes.

V-TWIN MOUNTS

V-Twin/Sports/Super Bike Mounts for the Original Red Only This mounting has been designed specifically for use with V-Twins

Complete Bracket Set

Please Note: one set of mounts of your choice are provided free when purchasing "The Big Blue" or "Original Red Bike Lift" or as an alternative or mix and match basis...

Wheel Mounts

Wheel Mounts for the *Big Blue Bike Lift and Original Red The two 'hoop'shaped Wheel Mounting brackets are able to slide in and out of the main lifting arm, thus allowing you to individually adjust each bracket to achieve the correct fitment ***"Eazy Rizer Big Blue" is designed for chassis lifting. Wheel mounts can only be used on a mixed and match basis.**
