

# **The Strongarm, Harley Davidson lift.**

Simply the Fastest and Safest way to lift any Harley Davidson motorcycle in just seconds for FRONT or REAR Wheel Removal cleaning or for the winter park up taking the load of the bikes tyres and suspension. Strongarm will hold your bike safe in a vertical position while you attend to the detailing and general maintenance and it will also work with any other flat bottomed "Twin rail frame" cruiser. You simply place the Strongarm under the bikes frame in the desired position for front or rear lifting and apply a slight pressure down on the arm then in a jiffy your bike is off the floor, Its that easy!
