

BikeGrab Wheel Chock

BikeGrab Universal Wheel Chock has been designed for use with all motorcycles old or new and can be used on either the Front or Rear Wheel, You simply Ride In, Get off and walk away! It will then hold your bike Safely in the vertical position with its Vice Like Grip and give you valuable extra space in the garage opposed to leaning over on the side stand!

In its standard form it will accommodate tyre sizes from 120 to 195mm width, for sizes below 120 you will need to use our Reducer Kit shown in the Drop Down Menu. We also provide the Quick Release kit for securing down to the garage floor or for use in Vans and on Trailers, with the plate secured down the BikeGrab can be Locked into place or removed in just seconds, Ideal when trailering the bike to the racetrack and then remove for use on the tarmac !

Harley Bagger Tie Down Anchors

Never again guess where to put your ratchet straps should you need or want to trailer your Harley Bagger. With our HD Tie Down Anchors simply remove the OEM front gas tank mount bolts and replace them with our Tie Down Anchor Kit parts.

As you can see in the photo's these Anchors live on the bike and when you need to use them just hook the strap to them, tighten and your done!

LED Lights

Since our inception the goal for bigbluemotorcyclelift.com has been to bring our customers top quality, motorcycle products that are not made off shore. Products that perform safely and that add safety to your ride. We are always on the look out for the best of the best in design and production quality and our new Cirius LED engine guard lights certainly live up to this commitment our customers. There are plenty of pictures and our video shows you just how unique our LED engine guard lights are.

What makes our LED Lights different?

Our patented design provides a low profile, durable housing with high performance LED lighting. Our products are made with hand polished 316 Stainless Steel. We utilize industry leading LED chips to provide high output and power efficiency. Our wrap around design enables a true fit for extraordinary resistance to the elements while adding a cutting edge, decorative and functional addition to any tube application. Our unique design facilitates heat dispersion through the attachment area enabling high output in a low profile format.

Currently we are offering our Cirius Engine Guard Lights – Handlebar Lights in 1” and 1.25” diameter with cool white, amber, red, blue and green LEDs. Available in mirror polish, black powdercoat and textured black powdercoat.

The days of gluing cheap led strips to your prized possessions are over. Seeing a valuable piece of machinery such as a motorcycle or boat with hanging wires and plastic glue on LED strips does an injustice to the look you are trying to achieve.

Cirius USA™ / Big Blue Motorcycle Lift lighting is the cutting edge in performance and design in low profile, high output, tube mounted LED lighting.

Note: bigbluemotorcyclelift.com is the exclusive distributor in Canada for the Cirius line of LED lighting. Our responsibility is to build a strong dealer network as well as a healthy retail presence with our online visibility. Dealer inquiries are welcomed and encouraged and should be initiated by contacting donaldwillick@gmail.com

StrongArm

StrongArm is a lightning fast Front or Rear wheel lift/jack that works on simple leverage, after locating in the desired position you simply apply a downward pressure to the Arm and up comes the bike safe and sound, it is so easy to use that a child could use it.

StrongArm has height adjustment built in so that it can be quickly set to use with the highest or lowest of cruisers, Great for cleaning those wheels or even removing them!

Nothing comes close to the speed and reliability of StrongArm, it was designed for Harley Davidson motorcycles but will work with all other cruisers that have a Duplex (twin rail) frame.

The top roller is heavily protected with re-inforced PVC tubing to protect your bikes precious paintwork!
